

DR. JENNIFER REICHEL

PACIFIC DERMATOLOGY & COSMETIC CENTER
SEATTLE, WASHINGTON
RENTON, WASHINGTON

American Board of Dermatology

WHAT IS YOUR APPROACH TO PATIENT TREATMENT?

I love the consultation process where I am able to create long-term rejuvenation plans with my patients. It is wonderful to see how much better they look and feel about themselves as time goes on. Whether it is correcting pigment issues or using Botox®, many of my patients have said that my work is like art.

WHAT DO YOU LIKE MOST ABOUT YOUR JOB?

The patients. I love hearing their stories and laughing with them—we're like a big family. The reason we are here is to take excellent care of our patients, and I have to take really good care of my staff in order to care for our patients. It is one of my mottos—"patients first, staff second, and business third."

WHY DO YOU PLACE A STRONG EMPHASIS ON BODY CONTOURING?

I have seen, firsthand, how the results of a body contouring procedure can help patients achieve the figures they've always dreamed of. By modifying my techniques to meet each patient's individual needs, I can offer them a host of contouring options to help slim and smooth their problem areas including the hips, waist, neck, back and abdomen.

NONSURGICAL REJUVENATION

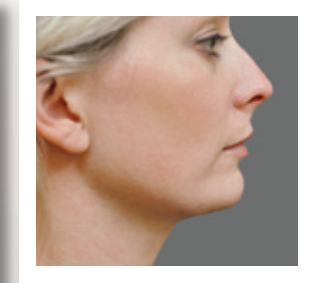

In terms of nonsurgical treatments, dedicated dermatologist Dr. Jennifer Reichel regularly uses a host of innovative, yet tried-and-true resources to restore volume, youthfulness and facial harmony—without using surgical intervention. "We may start with Botox to ease expression lines and then use fillers to revitalize hollows, followed by a prescribed, customized skin-care regimen," says Dr. Reichel. "I enjoy the technical aspects that aesthetic procedures demand. Each procedure presents different artistic challenges that motivate me to give my patients my very best, every time."

BEFORE

CASE 1

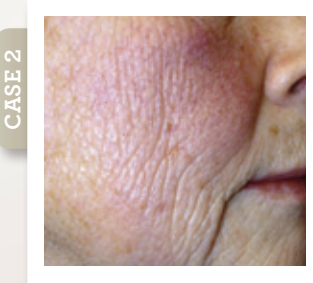

AFTER

▶ INSTANT CONTOURS

To help reduce excess fatty tissue beneath the chin and restore youthful contours, this patient had liposuction and on her neck and jaw, as well as Ultherapy for a lifted look.

BEFORE

CASE 2

AFTER

▶ REJUVENATING RESULTS

To help diminish her deep wrinkles and lines, as well as discoloration, this 71-year-old patient underwent a TotalFX CO2 fractional laser resurfacing treatment with Dr. Reichel.

- Sclerotherapy

BOARD-CERTIFIED COSMETIC DERMATOLOGIST DR. JENNIFER REICHEL EMPLOYS AN ALL-ENCOMPASSING APPROACH, PERFORMING EVERYTHING FROM LIPOSUCTION FOR BODY CONTOURING TO LASER HAIR REMOVAL, WITH THE GOAL OF REVITALIZING HER PATIENTS' BEAUTY. FROM LASER AND LIGHT-BASED THERAPIES, TO INJECTABLES LIKE BOTOX®, RESTYLANE® AND RADIESSE®, THE COSMETIC OPTIONS AT THE PACIFIC DERMATOLOGY & COSMETIC CENTER ARE NUMEROUS.

WHY DID YOU BECOME A DERMATOLOGIST?

I have always been procedurally oriented and originally wanted to become a trauma surgeon. I woke up one morning after a long night in the ICU and realized that, although I loved the idea, I wanted to have a more balanced life. This desire led me to pursue dermatology, and best of all, I still get to perform surgical procedures. My practice is 50 percent Mohs skin cancer surgery, and 50 percent cosmetic surgery, so it's a great balance for me.

WHY DO OTHER PHYSICIANS REFER PATIENTS TO YOU?

I work with an amazing staff and we do our very best to provide high-quality treatments and care, while being really honest about the outcomes we can achieve. Other physicians in the community tell me that they refer patients to me because they know that I am going to deliver honest information. But we also like to have fun, so we attract patients that like that style of being happy and funny.

WHAT NEW TECHNOLOGIES DO YOU OFFER?

Ultherapy® and Liposonix® are two new, noninvasive rejuvenation options for our patients. I love the idea of ultrasound technology and how it is able to skip through layers of skin to treat underlying tissues without heating the surface. And there is no downtime.
